

# APPLIANCE EFFICIENCY ENFORCEMENT RULEMAKING WORKSHOP

You are cordially invited to a Public Workshop on California's Appliance Efficiency Enforcement Rulemaking.

- Learn how we propose to establish a fair and consistent enforcement process for assessing monetary penalties
- Learn how draft rules might affect your business
- Learn how we are proposing to reduce unnecessary costs to consumers and to eliminate unfair business competition
- Share your perspectives with Commissioners and Staff

California's Appliance Efficiency standards have saved consumers billions in energy costs, saved enough energy to power millions of homes, and significantly reduced greenhouse gas emissions. In recognition of these benefits, the Legislature gave the Commission another tool for ensuring compliance. Senate Bill 454, which became law in 2011, authorized the Energy Commission to establish an administrative enforcement process for the assessment of monetary penalties for violations of the standards.

The Energy Commission is committed to developing an enforcement process that is fair, consistent, open and transparent by engaging the regulated community and other interested parties. You are welcome to participate in person at the California Energy Commission or online via WebEx. We look forward to hearing from you.
